EXERCISE ECOM2

Require Student submit PDF: **ecom2_lớp_nhóm_chữ-đầu-họ-tên**

- Copy VP figures
- ChatGPT code
- Your real code after correcting from chat (comment what you do)
- Copy interface demo

Due date:

- Các lớp Chính quy **Tối THỨ NĂM 24/10 by 12:55-PM**
- Các lớp CLC **tối Monday 28/10**

CONTENT: Sub E-commerce system includes classes Customer, Cart, Item (abstract class for classes Book, Clothes...), Order, Shipment, Payment, Comment, Rating. Cart is association class of Customer and Item; Cart contains idCustomer; Order contains Customer information, Shipment, Payment and Cart.

1. Design these classes with DAO, MVC Layers
2. Add function **search** to select item and add to Cart. Select **payPal** to process payment; select **drone** to simulate shipping
3. Generate code with java Spring and complete code to demo
4. Interface web or smartphone for customer: search, create cart, select pay, select ship, give Comment/rate
